25X1A

1. The Olomouc (Olometz - P50/N85) plant of the Moravian Iron and Steel Works (Moravske Ocelarny a Zelezarny) is opposite the Olomouc railway station. The plant consists of a foundry and several production departments. Production includes: caterpillar tracks for military vehicles of all kinds, crank shafts for automobiles, axles for railway cars and various automobile parts. Ceskomoravska Kolbens Danek in Prague is the major customer for these products.
2. As of 1 June 1950 the factory employed approximately 1,500 workers, of whom about 300 have been assigned to the workers' militia. In addition to these, 150 convicts are on loan to the factory. About 40 percent of the convicts are under sentence for minor political crimes, 40 percent are Germans, and 20 percent are criminal convicts. They are interned in a prison within the plant and are guarded by the workers' militia.
3. In addition to the workers' militia, there has been established a permanent militia whose duty it is to guard the main entrance to the plant and the convicts day and night. From 6 AM until 6 PM they are on duty guarding from the watch towers and guard posts in and around the plant. At night, only four members of the permanent militia are on guard within the plant and one at the main gate. No person is permitted to enter the plant without an identity card. The militia members wear plain clothes with a red ribbon on the left sleeve, and are armed with a CZ 7.65 mm pistol with one clip. The guards are changed every twelve hours.
4. The arms room is located on the ground floor and at present contains approximately 350 rifles, several hand grenades, a few Russian sub-machine guns (7.62 mm) and some light machine guns. The arms room in the plant administration building contains a considerable supply of ammunition.
